

Samuel Rajesh Vanambattina

Data & analytics – insight, automation, reporting

Vijayawada, Andhra Pradesh Open to Hyderabad · Bengaluru · Chennai · Pune

samuelrajesh13@gmail.com

PROFILE

Data and analytics professional with 8+ years across PricewaterhouseCoopers (New York) and Amazon Web Services (Seattle), delivering analytics, ETL automation and management reporting for financial services and technology clients. Carnegie Mellon MISM. Experienced managing teams of up to four and shipping automation that removed 500+ hours of annual manual effort. Currently running operations for a family-owned retail and supply-chain business; returning to a full-time analytics leadership role.

EXPERIENCE

Apr 2024 – Present

Business Operations Manager

Family Enterprise · Vijayawada, India

- Manage purchasing and vendor relationships across three retail outlets in a South India leather goods supply chain.
- Built a monthly sales and margin tracker in Excel and SQL, replacing manual ledger records.
- Grew revenue **~20%** over 18 months while reducing raw material costs **10%** year-on-year.

Oct 2023 – Mar 2024

Career Break

- Planned break for family responsibilities.

Apr 2022 – Sep 2023

Manager

PricewaterhouseCoopers · New York, NY

- Led development of a proof-of-concept low-code application (Appian) demonstrating an end-to-end automated data pipeline for a financial services client.
- Managed a cross-functional team of four — assigning work, reviewing deliverables and reporting progress and risk to leadership.
- Advised clients on mapping regulatory compliance requirements to their risk and controls library.

Jul 2021 – Mar 2022

Business Analyst

Amazon Web Services · International Product Management · Seattle, WA

- Designed, built and maintained analytical dashboards for customer and region assessment using Python, Tableau and Amazon QuickSight.
- Delivered monthly and quarterly KPI scorecards for global infrastructure regions, giving stakeholders a decision framework for region expansion strategy.
- Automated ETL workflows across APAC, EMEA and LATAM, reducing manual reporting effort and increasing refresh frequency.

Aug 2017 – Jun 2021

Senior Associate

PricewaterhouseCoopers · Digital Risk Solutions · New York, NY

- Automated generation of complex loss triangles for a large insurance client using Alteryx, R and SQL, delivering **500+ hours** of annual savings.
- Led an Innovation CoE team to build and launch SOX Scoping Central — a cloud platform used by **100+ internal users** to analyse client financial statements and assess material risk of misstatement.
- Recreated 100+ financial reports for high-risk business units by translating and recalculating business logic in SQL and Python under audit.
- Designed and implemented data governance policy frameworks for a Midwest banking client.

May 2013 – Jun 2015

Analyst

Accenture Services · Data Analytics Team · Chennai, India

- Built end-to-end ETL pipelines to rebuild a data warehouse for a major US healthcare client, minimising data redundancy.
- Supervised a team of three analysts, managing knowledge transfer and SLA adherence.
